Software for Institute Management (SIM) is a completely integrated to help you run your entire Education Institute more efficiently. It allows you to replace multiple and costly applications with one simple and affordable system that automates all your business processes. Using the Client/server Architecture i.e. one central database, all your employees use the package to their jobs more effectively, securely accessing the system from anywhere and at any time.

SIM is based on pyramidal Organizational Structure followed Worldwide. It is designed to effectively inter link and consolidate the complete System Hierarchy from Operational to Strategic level. This not only reduces complexity but also helps in better decision making.

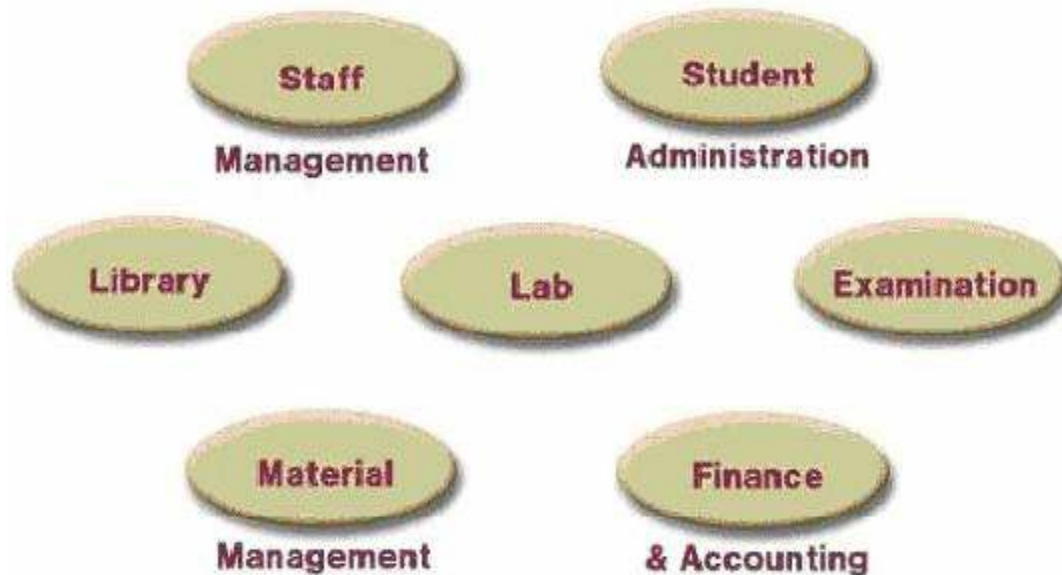

Organization Levels and Systems

SIM will help you in streamlining the **Transaction Process, Managerial control** and **Strategic Planning** Processes of your Organization and thus will save your business time and money. It will improve **efficiency** and **productivity** of your system and will help your Institute grow faster. It is the Ideal Software for Institutional management solution for any type of educational setup.

End-to-End Business Process Management

Till now either you were not using any application or were forced to buy multiple applications to manage your institutional activities like student Administration, Employee Management, Lab, Library, material Management etc. and that too not customized somehow to run your educational setup, which is a costly and time-consuming problem.

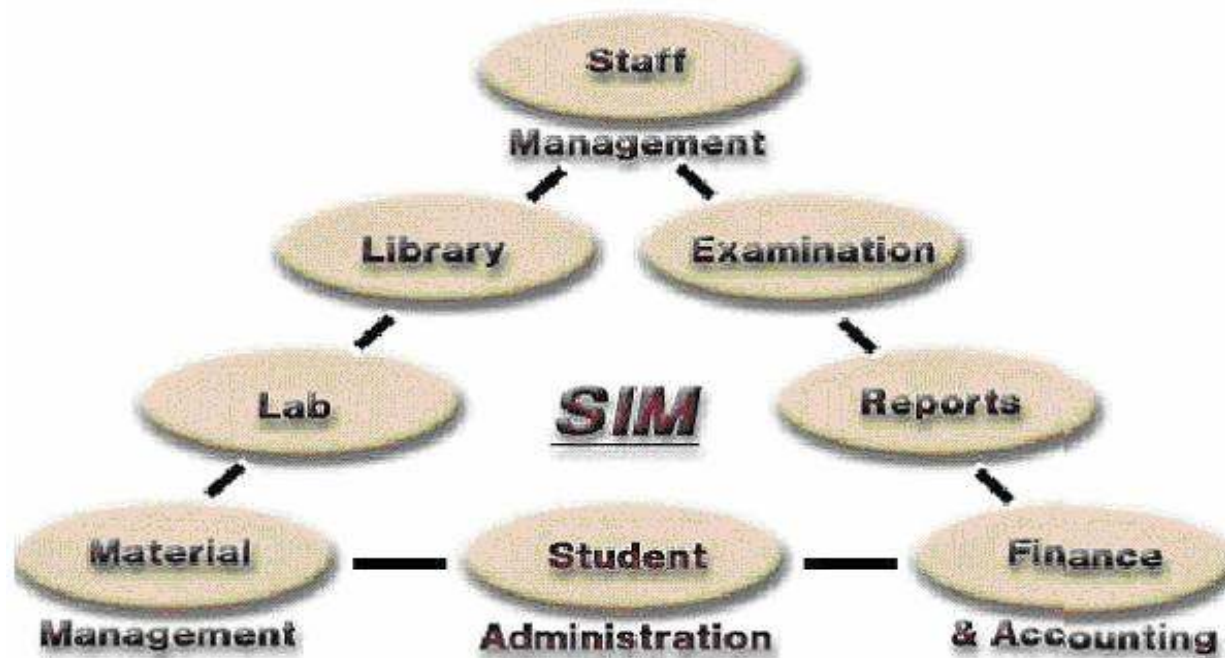

Island Data System

The Result of having an Island Data System

Incomplete and Inaccurate Information Leading to wastage of Money and Time.

Sim is specially designed to maintain the integrity and “flow” of your business – for the way business really works, in flows of information between you and your employee’s customers and venders. It is one system to manage your entire institutional setup from end-to-end. Whether you are running a small school or a big professional education institute. SIM can improve your productivity dramatically.

Integrated Data System

Create Your Web Presence Easily

A customization service along with SIM allows you to have interactive Web site without hassles - with any ULR you choose. Your Web presence can be completely integrated with every other component of the package. Some of the web- features can be:

- Online Display of results
- Online Leaves and attendance Management
- Information
- Connectivity to your Customer and Supplier

With your SIM package, you get comprehensive e-commerce at a fraction of the price.

Advance Accounting Features

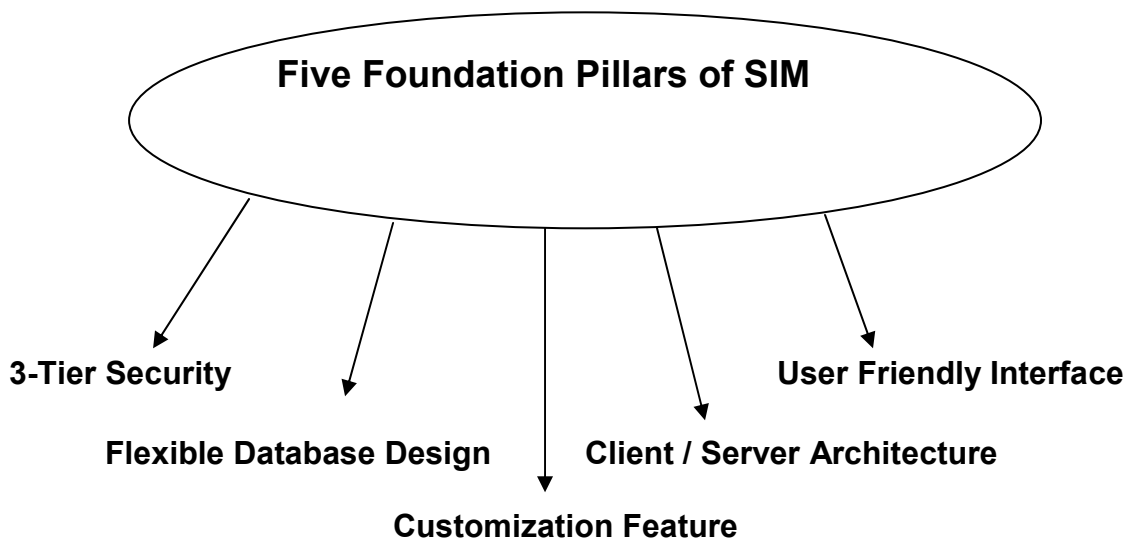

SIM gives you all the accounting functionality you need to run your business: you can send invoices, pay bills, pay employees, track inventory, and record time and expenses. Since you are using one completely integrated system, all the features are designed to work optimally with the other components, eliminating the need to ever re-enter data.

Analyze and Make Better Decisions

If you've ever been frustrated trying to combine information from many different places, or not being able to access the information you need, then you know first-hand that good reporting is crucial to your business. It's simple: you need accurate information to make smart decisions. You need to see current information, and it needs to be complete. With SIM, you have access to up-to-the-minute real-time business data, and it's always complete because all your business information in an integrated database.

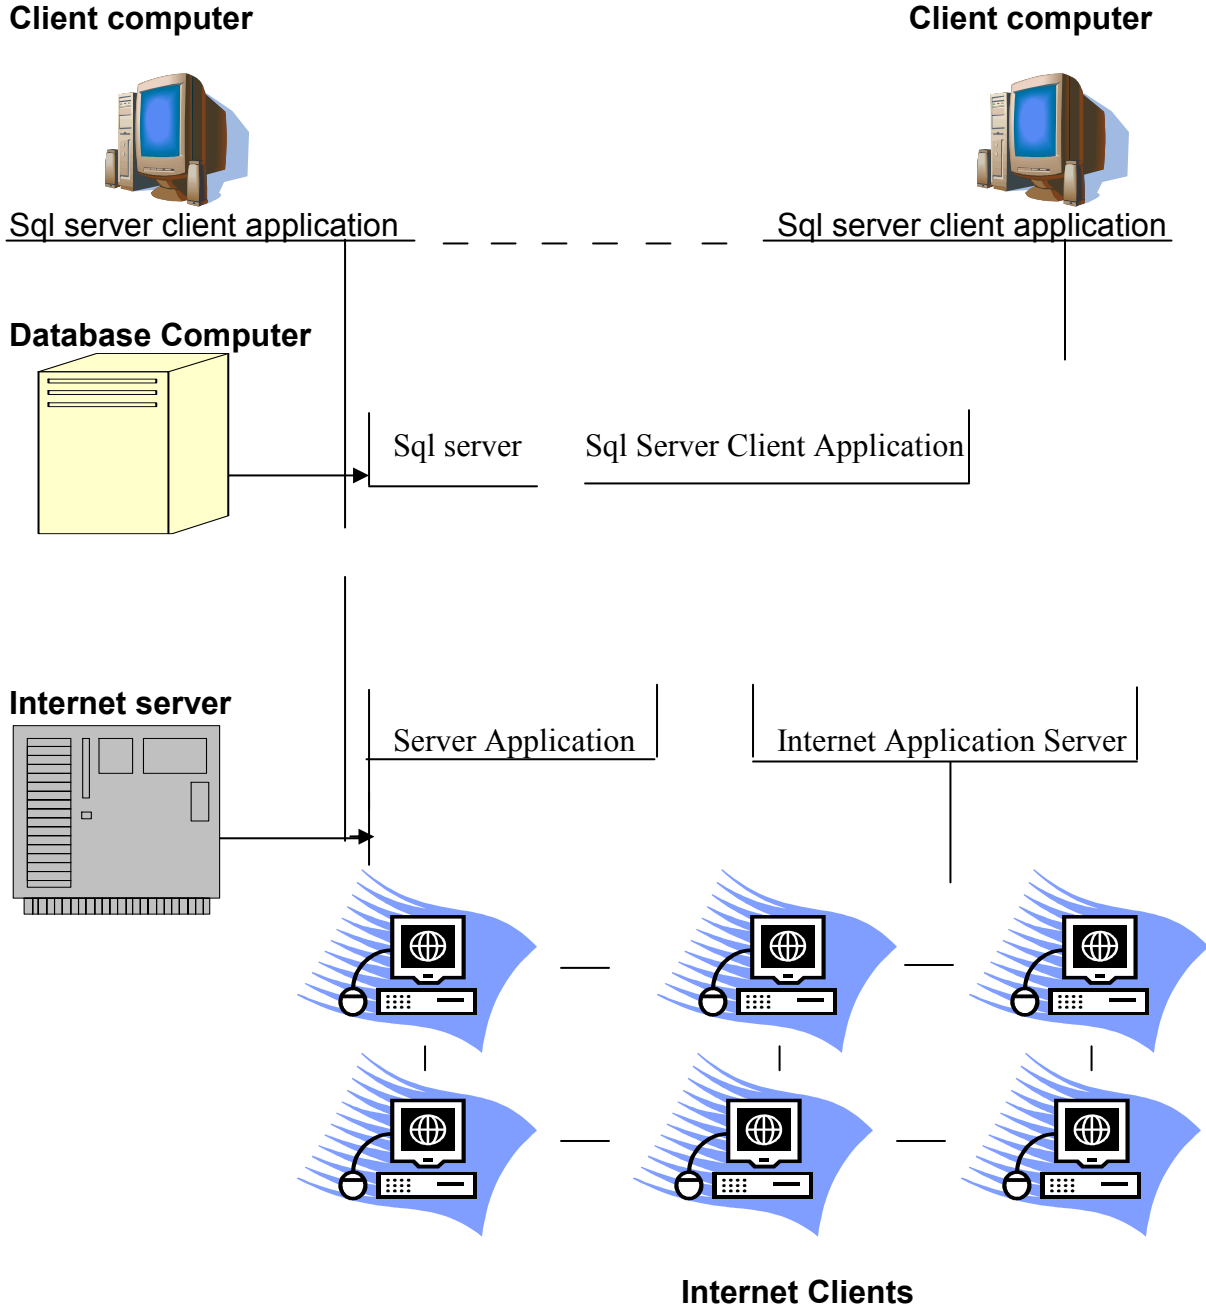

SIM comes with number of standard reports to help you better understand your business. And our advanced search, Analysis and customization features allow you to tailor your reporting to fit the exact needs of your institutional working.

Foundation Pillars of SIM
